SANKET SINGH

Senior Full-Stack Engineer | Backend Systems | Generative AI

singhsanket27@gmail.com | +91 94059 45413 | LinkedIn: sanketsingh27

Professional Summary

Senior Full-Stack Engineer with 6+ years building backend services, APIs, and microservices across financial services, e-commerce, and logistics. Published an AI-powered iOS application and developing LLM-powered research and semantic job-matching systems. Experienced in gathering client requirements, translating business rules into software, and automating manual workflows.

Technical Skills

- **Languages & Backend:** Python, TypeScript, JavaScript, Node.js, FastAPI, Express.js, Hono, REST API development and integration, WebSockets, microservices.
- **Generative AI & Agent Development:** Gemini, OpenAI SDK, DeepSeek, Vercel AI SDK, Cloudflare Workers AI, LangChain, LangGraph, Deep Agents, LangSmith.
- **Retrieval & Databases:** Embeddings, semantic search, LLM-based reranking, vector databases, Cloudflare Vectorize, PostgreSQL, MongoDB, Redis, Elasticsearch, SQLite.
- **Infrastructure & Tools:** Cloudflare, Docker, Kubernetes, Kafka, Jenkins, Git, Swagger/OpenAPI, Braintrust, Sentry.
- **Frontend & Mobile:** React, Next.js,

Projects

Noro - AI-Powered ADHD Productivity Assistant link

Swift | SwiftUI | Gemini | OpenAI SDK

- Built and published an iOS productivity assistant that converts unstructured voice input into actionable tasks and automatically schedules activities.
- Integrated Gemini for task creation with OpenAI model fallback, providing an alternative processing path when Gemini is unavailable.

Bibi - AI-Powered Market Research & Consumer Insights Platform link

Python | FastAPI | LangChain | LangGraph | Deep Agents | LangSmith

- Developing a Python/FastAPI research platform covering 3 App Store storefronts, organizing customer feedback into pain points, feature requests, and positive signals linked to supporting reviews.
- Building multi-step research workflows with LangChain, LangGraph, and Deep Agents for theme extraction and Q&A, prompting responses to cite reviews and acknowledge insufficient evidence.
- Implementing validation to reject unknown review IDs, duplicate findings, and missing explanations, with LangSmith tracing and evaluation to monitor extraction quality and latency.

Onward — AI-Powered Job Matching Platform

Cloudflare Workers AI | Cloudflare Vectorize | Hono | React

- Built a job-matching prototype that sources listings from a job portal and retrieves relevant opportunities using job and resume embeddings stored in Cloudflare Vectorize.
- Integrated LLM-based reranking through Cloudflare Workers AI to prioritize retrieved (RAG) opportunities by candidate fit and display personalized recommendations in a React application backed by Hono.

Professional Experience

Senior Software Developer | Edgewaters Markets

Jun 2025 – May 2026

- Established user-level traceability for trading-platform operations by revamping audit logs to capture actions, executed commands, and before-and-after states for security review.
- Replaced manually triggered calendar-sync scripts with cron-based automation across trading platforms, adding configurable platform selection and execution schedules.

Senior Software Developer | Napses Technology

May 2024 – May 2025

- Reduced manual testing effort by 5 hours per day by developing Magically, a Chrome extension for end-to-end test generation with version-control integration.
- Standardized API documentation using Swagger/OpenAPI and deployed an API server behind an NGINX gateway to centralize API access.

Technical Consultant / Technical Product Manager | ANK Upsurge Digital

May 2023 – May 2024

- Gathered requirements directly from a client and automated Google searches and CSV exports for SEO research, saving 3 hours per day while retaining manual Ahrefs uploads.
- Reduced link-acquisition costs by 20% by improving domain-matching logic in link-building tools developed with Node.js and React.

Full-Stack Developer | Undocked Technology

Aug 2022 – Apr 2023

- Reduced website load time by 15% through query caching, database-query optimization, and pagination.
- Implemented Thai-language localization using i18n, adapting application content for regional users.

Founder | CommitCamp

Jan 2022 – Aug 2022

- Built a learning management system with centralized student-progress tracking and a Sandpack-based live coding environment for instructor-led programming sessions.
- Saved 30 minutes per day in administrative work by automating assignment distribution and grade management.

Backend Developer | High Peak Software

Jul 2021 – Jan 2022

- Co-developed intra-bank and inter-bank settlement workflows for ICICI Bank using Node.js streams and Redis messaging, replacing sequential cron-driven processing and reducing processing time from hours to minutes.
- Partnered with business and product teams to clarify settlement rules and system constraints, translating requirements into custom processing logic.

Full-Stack Developer | Coutloot

Aug 2019 – Jul 2021

- Reduced search response time by 87%, from 1.5 seconds to 200 milliseconds, by replacing MongoDB search with Elasticsearch, contributing to a 20% increase in sales.
- Reduced development time by 15% by leading the Angular-to-React migration and improving interface consistency.
- Integrated Shiprocket and other delivery APIs to support shipment-delay tracking, return-to-origin management, and shipping-cost optimization.
- Migrated the application to a microservices architecture with Docker-based deployment, improving modularity and simplifying deployments.

Education

Bachelor of Engineering in Computer Technology

KITS, Nagpur | Jun 2013 – Apr 2017
